

The **Aluminium Door** series has been specifically designed for narrow stile aluminium section. Suitable for use with either single or pairs of doors and compatible with electric strike systems for situations where remote controlled access is required. Key features include hardened steel pins to reinforce both the latch bolt and anti-thrust pin. Available with a standard keypad (BL2202), a back to back version (BL2022) and a key override model (BL2702) ideal for maintenance personnel. The 6002 offers a full sized lever handle with a free acting clutch and is well suited to high traffic situations.
